

# insunomi

**International  
citizenship with  
digital identity**

---

[www.insunomi.com](http://www.insunomi.com)

# About us

Insunomi is a pioneering blockchain project that aims to build an equitable, sustainable, and digitally empowered global citizenship ecosystem across borders. Our project aims to democratize access to citizenship rights worldwide by digitally securing individuals' identities and rights.

## Our Mission

By democratizing access to citizenship rights worldwide and enabling individuals to collaborate globally, we create a global citizenship ecosystem that transcends borders, is equal, sustainable, and digitally empowered.

## Our Vision

In the future, we envision a world where everyone has equal rights, there are no borders, and everyone can use their potential to the fullest. Insunomi is an important step towards realizing this vision.

# Key Features of Insunomi

- 1 Global Chain Blockchain**  
A scalable, secure, and sustainable blockchain designed to support the Insunomi ecosystem.
- 2 ICDI Framework**  
International Citizenship with Digital Identity provides individuals with verified, blockchain-secured digital identities.
- 3 Nomicoin (TRC-20)**  
The native token for transactions, governance, and staking within the Insunomi ecosystem.
- 4 Decentralized Governance**  
A DAO model enabling token holders to shape policies, fund projects, and influence decisions within the ecosystem.

# Tokenomics

## Token Details

Name: Nomicoin  
Network: Tron TRC-20  
Total Supply: 10 Billion NOMI

## Use Cases

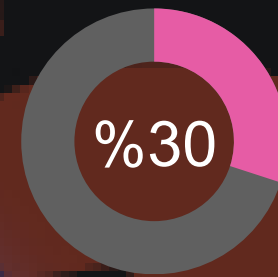

**Governance:**  
Vote on proposals within the DAO.

**Digital Passport:**  
Use NOMI tokens to secure an ICDI digital passport.

**Staking Rewards:**  
Stake tokens for passive income and ecosystem rewards.

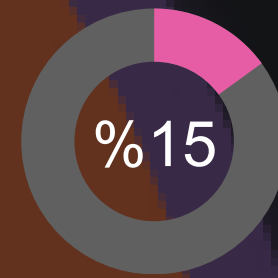

**Transactions:**  
Facilitate payments and services across the Global Chain network.

**The Global Chain Blockchain:**  
The Global Chain is a purpose-built blockchain for powering Insunomi's decentralized ecosystem.

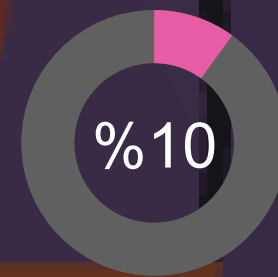

**Community and Staking Rewards (30%)**  
Amount: 3 billion NOMI  
Purpose: Fund staking rewards and community activities to grow the community and encourage their growth.

Description: It supports in the long term and ensures active use of the ecosystem.

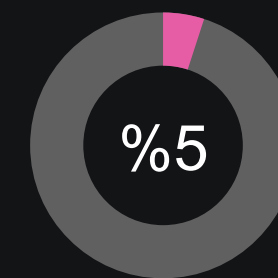

**Reserve and Sustainability Fund (15%)**  
Amount: 1.5 billion NOMI  
Purpose: Reserve to be used for emergencies, long-term sustainability of the ecosystem, and market stability.

Description: Provides security for managing market fluctuations and unexpected situations.

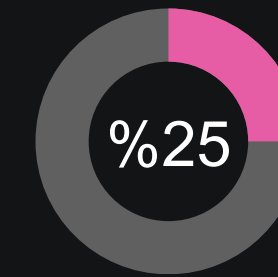

**Strategic Partnerships (10%)**  
Amount: 1 billion NOMI  
Purpose: Fund to be used to support partnerships and integrations.

Description: Encourages projects, companies and organizations to join the ecosystem.

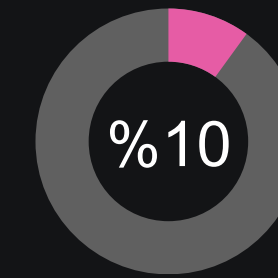

**Marketing and Awareness (5%)**  
Amount: 500 million NOMI  
Purpose: Fund allocated for project promotion, user acquisition and events.  
Description: Includes advertising campaigns, events and educational programs.

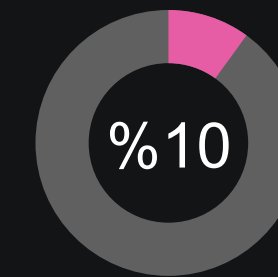

**Development and Technology Fund (25%)**  
Amount: 2.5 billion NOMI  
Purpose: To expand the technological infrastructure of the project and implement blockchain network applications.

Description: Used for Blockchain development, Global Chain features and selecting new features.

**Team and Founders (10%)**  
Amount: 1 billion NOMI  
Purpose: To compensate for the contributions of the team and founders and to maintain their motivation.

Description: Offered with a vesting plan (lock-in period), thus minimizing the risk of early sales.

**Public Offering and Initial Listing (10%)**  
Amount: 1 billion NOMI  
Purpose: Amount of tokens to be offered to individual and institutional investors during the initial offering.

Description: Provides initial liquidity during the initial funding phase and on exchanges.

## Low Transaction Fees

- Proof-of-Stake (PoS) Consensus Mechanism
- Optimized Smart Contracts

# Global Chain

## The Next- Generation Blockchain Solution

## Environmental and Social Responsibility

- Green Blockchain Technology
- Community-Driven Projects

## Digital Identity Management

- NFT-Based Identities
- Data Security and Privacy
- Global Recognition

## High Scalability

- Sharding Technology
- Hybrid Solutions

# International Citizenship with Digital Identity

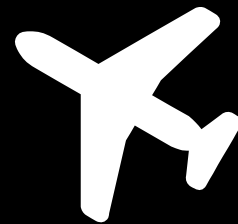

(ICDI)

The concept of ICDI focuses on granting individuals a blockchain-secured digital identity. This identity ensures access to universal rights and privileges while transcending traditional nation-state boundaries.

## Key Benefits

1. **Global Mobility:** Recognized digital passports for seamless international travel.
2. **Economic Access:** Cross-border financial inclusion for unbanked populations.
3. **Security and Privacy:** Immutable records and user-controlled data sharing.

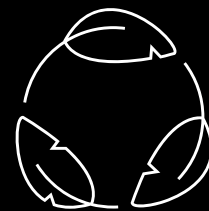

### Global Mobility and Travel

Blockchain-verified digital passports.  
Simplified visa applications and border crossings.

### Social Security and Welfare

Access to decentralized healthcare, education, and financial services.

### Sustainability and Environmental Impact

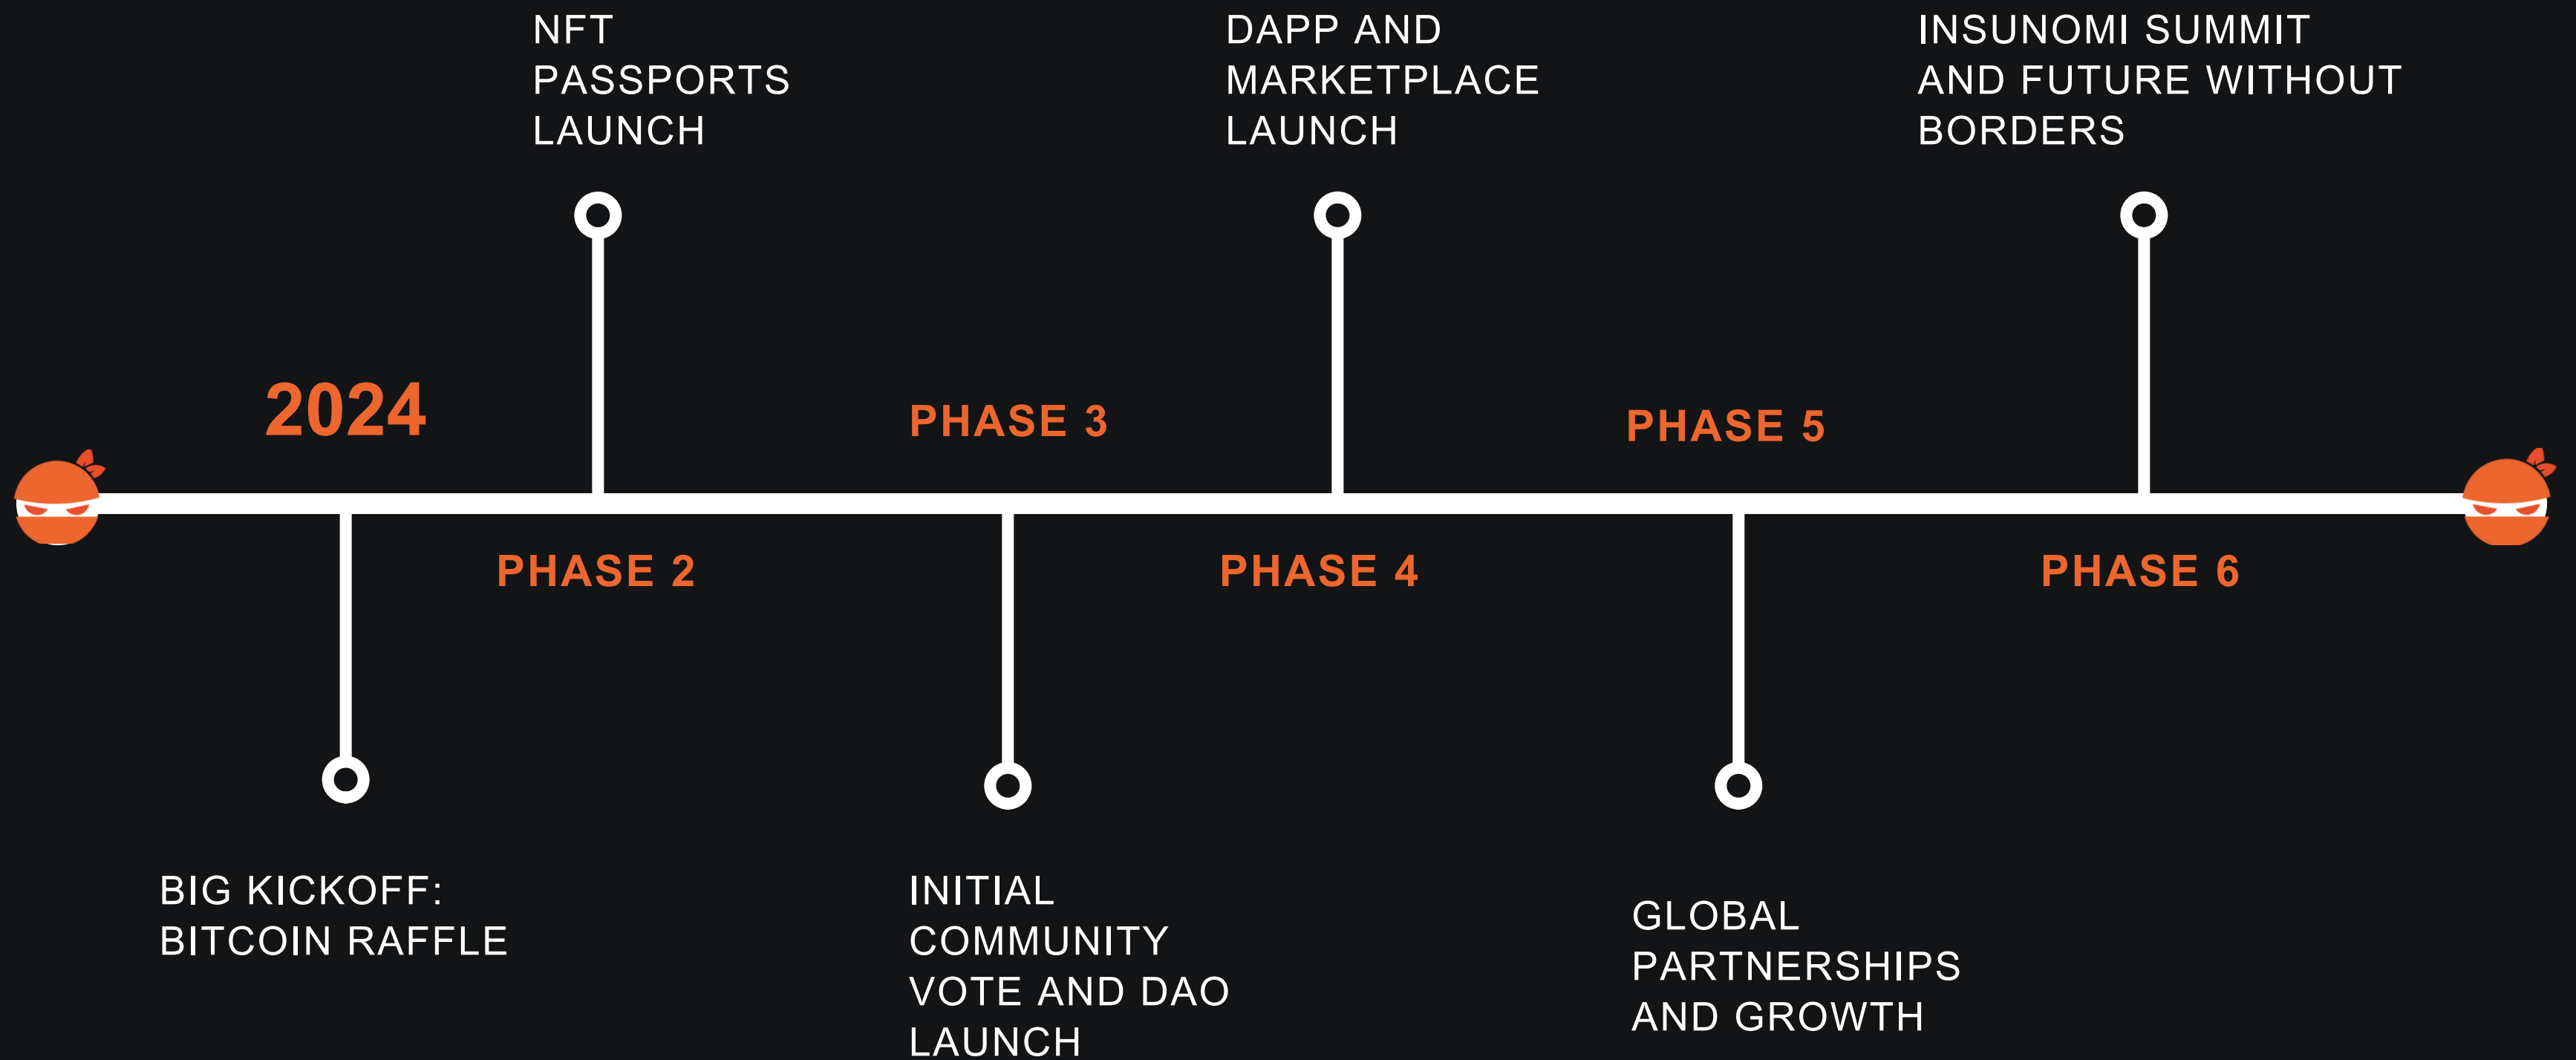

Tokenized funding for eco-friendly projects.

### Space Exploration and Beyond

A digital identity system for interstellar human exploration initiatives.

# Roadmap

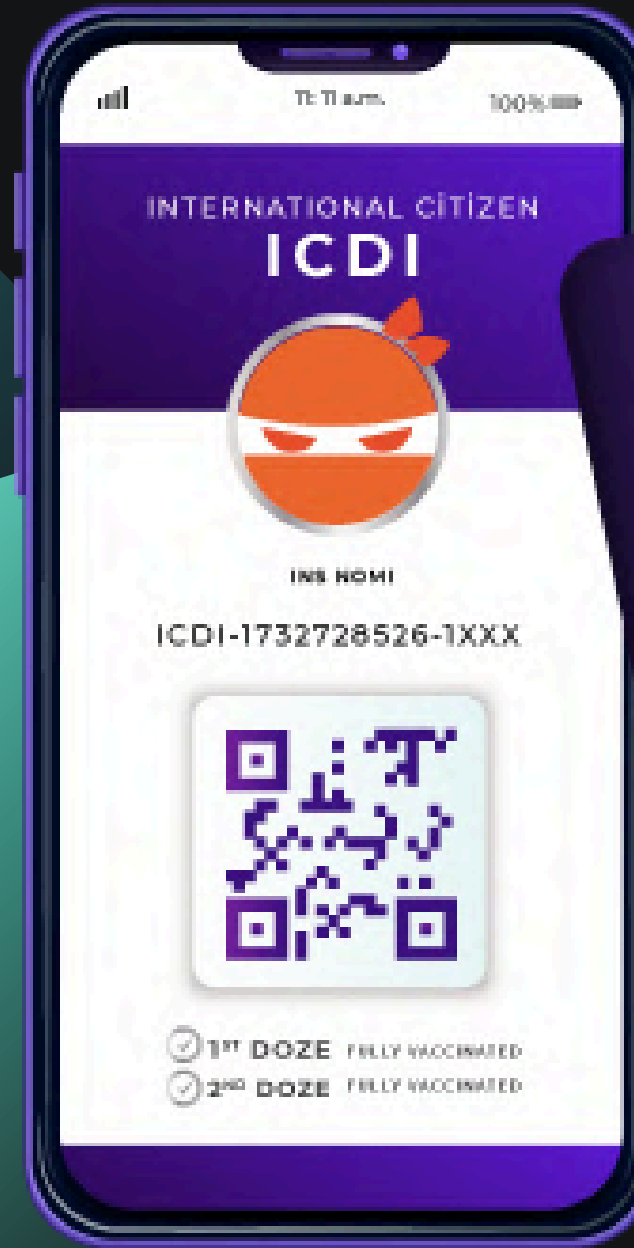

# NFT

- Uniqueness and Security
- Global Recognition
- Customizability and Identity Management
- Integration Across Industries

# Passports

Empower your identity,  
experience the world  
beyond borders!

## How Does It Work?

### 1. Blockchain-Based Identity:

- NFT Passports are digital representations of the holder's identity, stored as NFTs with cryptographic signatures, biometric data, and personal information securely encoded.

### 2. User Control:

- Owners manage and share their data selectively, maintaining complete privacy and security.

### 3. Real-Time Verification:

- Blockchain ensures real-time, tamper-proof identity verification whenever needed.

# DApp Marketplace Launch Strategy for **Insunomi**

## Vision for the Marketplace

The DApp Marketplace will operate as a multi-functional platform, combining elements of:

- **A crypto exchange:** Enabling seamless trading and integration of NOMI for transactions.
- **An app store:** A repository for decentralized applications tailored to governance, identity, security, and more.
- **A global hub:** Offering tools and applications for sustainable development, travel, security, and financial inclusion.

## Key Features of the DApp Marketplace

- **Seamless Integration with NOMI:** NOMI will serve as the primary currency for transactions, staking, and rewards within the marketplace.
- **User-Friendly Design:** A sleek, intuitive interface similar to app stores, but powered by blockchain for transparency and security.
- **Multi-Category Applications:** Identity and governance tools. Environmental impact trackers. Decentralized financial (DeFi) tools. Travel and international services like visa verification.

## Launch Phases

- **Announcement Campaigns**
- **Partnerships**
- **Beta Testing**
- **Global Online Event**
- **Free NOMI Giveaway**
- **Developer Spotlight**
- **Continuous Listings**
- **Developer Incentives**
- **Marketing Push**

## Integration with Existing Ecosystem:

- **Supporting NFT Passports for identity-based services.**
- **Collaborating with the Global Chain to ensure low fees and high scalability.**
- **Enabling decentralized finance (DeFi) opportunities**

## Revenue Model

- **Transaction Fees:** A small percentage fee for transactions within the marketplace.
- **Premium Listings:** Developers can pay to promote their DApps.
- **Subscriptions:** Access to advanced marketplace features or premium DApps via subscription plans.

# Global Partnerships and Expansion

Objective: Strengthen the Insunomi ecosystem by forming strategic global partnerships that accelerate the adoption of NFT Passports, the NOMI, and Global Chain technology worldwide.

## The Importance of Strategic Partnerships

### 1. International Organizations and Governments:

- Digital Identity Integration: Collaborate with governments to integrate NFT Passports into international identity systems.
- Travel and Visa Facilitation: Enable NFT Passports to be used with airlines, hotel chains, and visa processing services.

### 2. Private Sector:

- Finance and Banking: Partner with banks and fintech companies to establish NOMI as a viable digital payment method.
- Technology Alliances: Integrate Global Chain technology into tech firms to offer cost-effective and secure blockchain solutions.

### • Success Metrics

- Adoption: Achieve official recognition of NFT Passports by at least 50 countries.
- Economic Impact: Reach 1 million active NOMI users.
- Partnership Network: Establish major partnerships across all continents.

### • Conclusion

This phase focuses on positioning Insunomi as more than a blockchain project—it aims to establish it as a global movement. Through strategic partnerships and international expansion, Insunomi will offer individuals and societies a sustainable and inclusive future.
